

ProjectReady™ Microsoft Outlook Connector

Manage Project Email and Make it Actionable from Microsoft Outlook

Advanced Application
Solution Designed
For Professional
Services Organizations

Use in the Cloud
or On-Premise
With SharePoint and
The Microsoft Cloud

With the ProjectReady™ Microsoft Outlook Connector, enjoy the benefit of working directly in Microsoft Outlook, keeping tight integration and control of email with your project sites.

Transform inbound, email based requests for information and maintain tight control and visibility with a seamless user experience across all document control activities. Send emails to projects and make them actionable by declaring what they are, (e.g. Change Order) and harness the power of workflow and reporting to keep track of critical project information.

With ProjectReady Microsoft Outlook Integration you can:

Save project emails and documents directly to your project sites

Un-silo project information locked inside your email to easily create RFI's

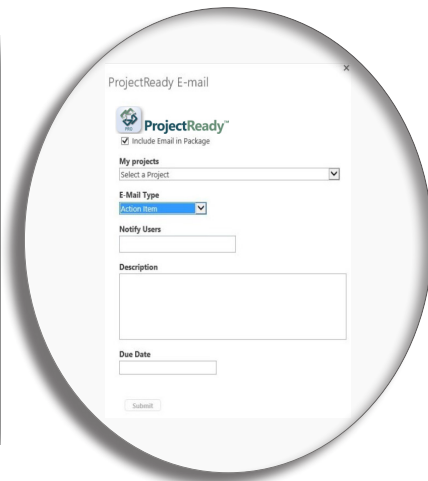

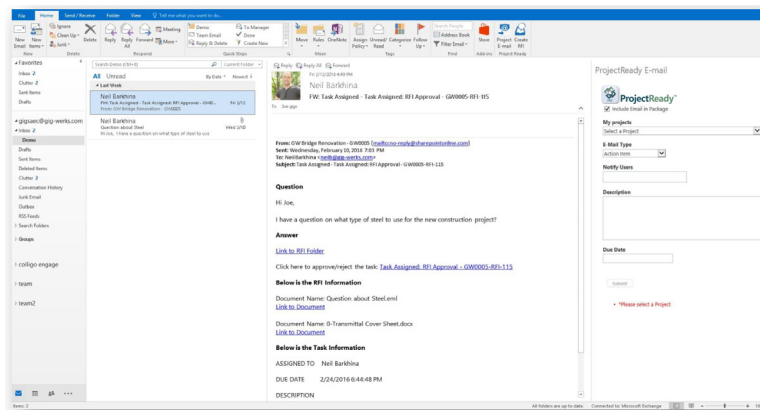

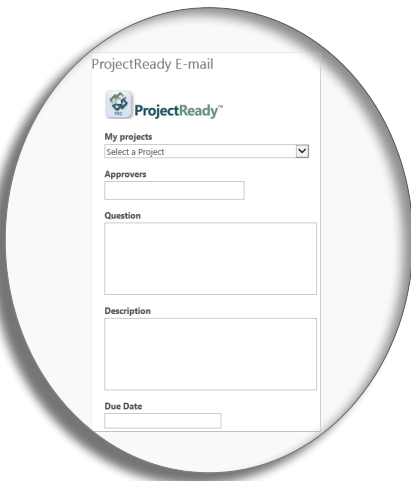

Assign Tasks Directly from Microsoft Outlook

Integrate project data from Outlook to drive search, reporting and analysis of your projects

Easily manage and track all project related email correspondences across your entire portfolio

Maintain a familiar, intuitive user experience, driving adoption and better control of your project data.

The Microsoft Outlook Connector for ProjectReady comes with our core bundle suite which includes our Collaboration Engine and Document Control Suite
