

ProjectReady™ Collaboration Engine

Project and Program Management Made Easy in SharePoint

Advanced Application
Solution Designed

For Professional
Services Organizations

Use in the Cloud
or On-Premises

with SharePoint and
the Microsoft Cloud

The ProjectReady™ Collaboration Engine makes Project Management easy with an intuitive end user experience that ensures advanced control and visibility across all your projects.

Collaboration Engine Features Include:

Project Management is made easy – our database & dashboards provide simple, automated real-time management of tasks & resources.

Create collaborative project sites on demand, driven by the business user

Users experience and Reporting that drives clear visibility across all projects and tasks

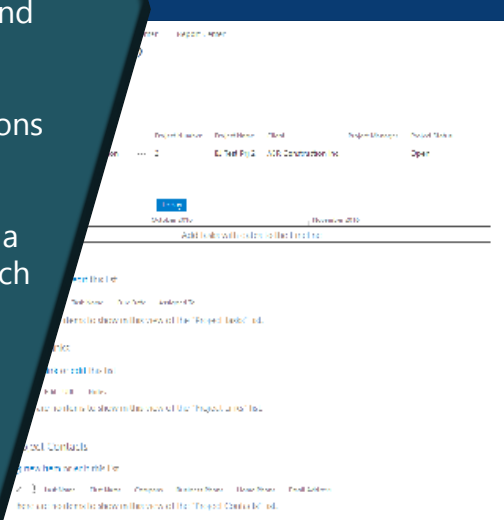

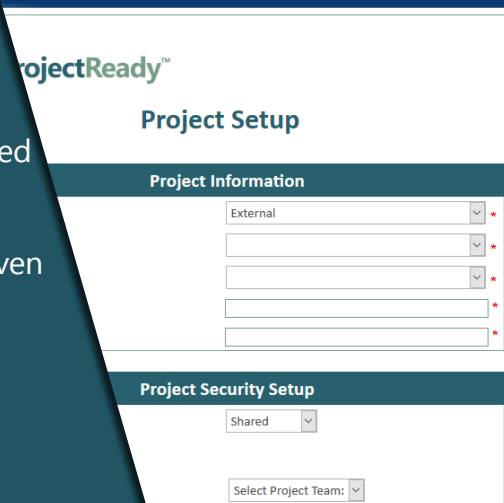

Project sites are created in a consistent fashion, enabling easy navigation and allowing users to find any piece of information with ease

Easily set and maintain site security and permissions throughout the life cycle of the project

Automatically tag and describe every element of a project from tasks to documents, enhancing search

Designed to integrate data from across all the systems that drive your project

Archive projects with ease
